NEWS AND UPDATES

- IMPORTANT INFORMATION ABOUT CHILD CARE PROVIDER ELIGIBILITY REQUIREMENTS:** The Federal Child Care Development Block Grant (CCDBG) Reauthorization Act of 2014 increases the health and safety requirements for all child care and early learning programs that accept child care subsidies. These changes include such provisions as ensuring that all providers are meeting all of the building codes, expanding who must get a criminal background check and requiring staff to take numerous health and safety trainings. Attendance at and completion of the required health and safety trainings will be tracked in the NJ Registry. For more information, go to <http://www.childcarenj.com/Providers/Training>.
- The CCDF Online College Credit CDA Scholarship for online CDA classes taken at Atlantic Cape Community College has been discontinued. Applications will no longer be accepted.
- NJ Registry members seeking to become **approved Professional Development (PD) Providers** can access the required PINJ *Core Knowledge and Competencies for Early Childhood Professionals* lessons and quizzes by logging into your NJ Registry profile and clicking on **My Resources – Resource Documents** in the left-hand sidebar, and then scrolling down to **Professional Development Provider System Requirements**.

On Demand Web Lessons

Welcome to your professional learning experience with Better Kid Care!

The professional development hours awarded by Better Kid Care (one or two hours) include time spent reading content, watching module videos, checking your knowledge, completing reflection and application exercises, and taking the post assessment. Because some of these activities may be completed away from the screen, total hours awarded may not equal dedicated screen time.

Research shows that professionals who continue learning offer higher quality care to children and youth. Our online lessons were created for professionals like you who want to learn to enhance programs for children and youth. No more than 9 hours of On Demand professional development will be awarded in one calendar day.

Enjoy your learning experience!

Foundations of Child Development for Child Care Center Teachers

Lesson overview

Child care professionals are responsible for environments, experiences and interactions that help all children in child care thrive and reach their full potential. The challenge is for the center child care provider to demonstrate how to meet the developmental needs of children of many different ages. In this module, providers can learn predictable ways that children change and learn new skills over time, to give the provider a solid foundation for daily practice and decision-making.

Lesson information

In this lesson you will read information on current research. You will view video scenarios from real practitioners in child care and after school programs. You will also complete activities and handouts throughout the lesson that help you apply the information to your child care or after school program. Be sure to take notes as you work on this lesson.

[Notes page](#)

As you work through this lesson there are handouts to download and print. Some handouts are writable PDFs where responses or information can be typed and then printed. Or you can choose to print the blank handout and complete it by hand. The handouts contain activities, additional ways to enhance learning, information to share with colleagues or parents, and strategies to apply what you learned to your child care program.

Lesson objectives

- Identify the benefits of learning about typical child development.
- Recognize the abilities children are born with that equip them to learn so much so quickly in the first years of life.
- Identify and describe the five domains of development and some of the changes that occur as children develop over time.
- Learn strategies to support children's development in the child care center classroom.

Title: Foundations of Child Development for Child Care Center Teachers

Description: Child care professionals are responsible for environments, experiences and interactions that help all children in child care thrive and reach their full potential. The challenge is for the center child care provider to demonstrate how to meet the developmental needs of children of many different ages. In this module, providers can learn predictable ways that children change and learn new skills over time, to give the provider a solid foundation for daily practice and decision-making.
